The **IS Working Paper Series** is a publication of the Information Systems Research Program (ISRP). It provides for the early dissemination of research by the IS faculty, students, and visitors, usually prior to its more formal publication elsewhere. The IS Reprint series includes these more formal publications, many of which supersede the original working papers. To obtain a downloadable index to both series, please visit our website at:

http://www.anderson.ucla.edu/documents/areas/fac/isrp/is_wp_index.pdf

Comments and feedback on our working papers are welcome and should be directed to the authors. Because their authors typically revise working papers within months of their issuance, we maintain only the most recent three years of the series for distribution. Most of these are downloadable from our website (see above). For copies of older papers, please contact the authors directly. ***See last page for information on ordering hard copies of working papers.***

Publication of the IS Working Paper Series is made possible in part through the generous support of the ISRP by the IS Associates. For further information on the IS Associates, please visit their website at:
